

# bikestore

The secure, flat packed bike store  
you can use anywhere

**The all NEW improved Bikestore now available**

- Stainless steel hinges
- Improved security
- Stronger wall panels
- Fully man portable

## Whether you prefer horsepower or peddle power, the Bikestore will keep your bike safe and secure and can be used almost anywhere.

Thanks to its robust steel construction and flat pack design, Bike Store can be simply carried to any location, easily assembled and used to keep your valuable bike secure.

All the components are man portable meaning they can be carried through narrow passageways and alleys or even through your house, opening up previously inaccessible places – no need for costly cranes or forklifts and no specialist tools needed for assembly – just a socket set and you're ready to get started.

Here's why Bikestore is so popular with bike owners...

- **Demountable:** Dismantles into flat-pack form quickly and easily for re-locating
- **Complete:** Everything required for assembly is in the kit
- **Secure:** Double locking system is standard
- **Simple:** No specialist tools are required for assembly, just a socket set
- **Easy to follow instructions** mean it's ready for use in 1 hour

Bikestore's unique design means you can literally use it anywhere it can be carried to. This means having secure and safe storage for your bike is even more accessible.

Once assembled, the fully galvanized steel Bikestore is remarkably robust, with a real double locking system with insurance rated locks to BS3621 to deter the most determined thief.

Assembly of the Bike Store is simple, quick and can be erected within one hour, all you require is a socket set.

### Key features include:

- Fully galvanized body, with powder coated door
- Simple to assemble with easy to follow instructions
- Optional 'Snap-in' shelf uprights & arms
- Low cost that represents real value for money
- Comes with a double locking system for additional security
- Floor mounted steel lugs for use with security chains
- A range of accessories to personal your storage options

## Technical Information

### General

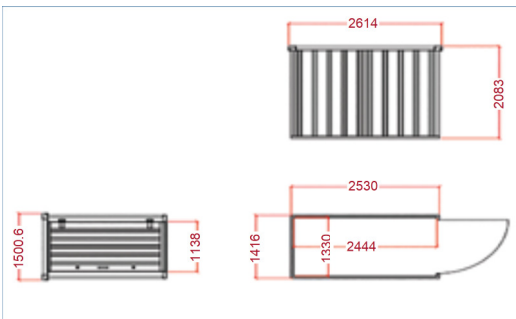

Bikestore's unique design means it's light enough to be man portable but strong enough to deter the most determined thieves. All the components can be broken down and carried through narrow passageways to previously inaccessible locations.

### Chassis and floor

Pre-assembled 18mm thick grade OSB3 board screwed to a galvanised steel box profile frame.

### Side walls, door and roof panel

0.6mm box profile galvanised steel panels, galvanised steel frame sections at the edges of each panel. The roof section has two integral gutters for effective rainwater dispersal to all four corners of the container. The door is pre-mounted into the frame on stainless steel hinges, complete with two insurance rated locks and a central roller catch. Door width: 1138mm, hinges on the right, outward opening.

• **Front Profile:** 1500 x 2083mm

• **Side Profile:** 2614 x 2083mm

• **Footprint:** 1416 x 2530mm

All flat pack units are 370mm high

All assembled units are 2083mm high

*Note: Due to our continuous product development programme, we reserve the right to change the specifications without prior notice.*
