expandakiosk

The UK's best selling hand portable flat packed kiosk

The ALL NEW improved Expandakiosk now features:

- Robust construction with fully insulated panels
- Fold up, hinged serving hatch
- Innovative flat packed design for complete flexibility

Providing flexible storage and serving space for a wide range of applications

The all new Expandakiosk from TP Structures is fully insulated and hand-portable making it ideal for a huge range of applications. Thanks to its innovative design and fold up hatch, Expandakiosk provides a temporary or semi-permanent building space for the catering, retail, tourism and commercial sectors, to name but a few.

- **Hand-portable:** Easily carried to previously inaccessible areas or across busy event grounds... can be used almost anywhere!
- **Demountable:** Dismantles into flat pack form quickly for transportation and re-assembling at another site or event
- **Complete:** Everything required for assembly is in the kit. No additional fixings needed
- **Secure:** Robust construction and double locking system is standard
- **Simple:** No specialist tools are required for assembly, just a socket set and a screwdriver
- **Quick:** Ready for use in less than an hour

technical specifications

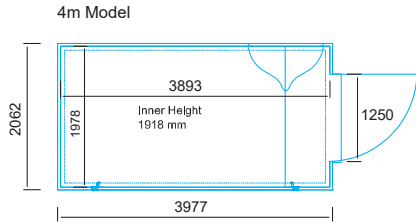

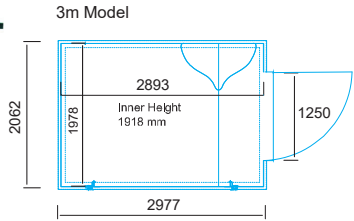

- Length: 3m or 4m
- Width: 2.1m
- Height: 2.1m
- All flat packed units are 300mm high
- All assembled units are 2080mm high
- Internal height 1918mm

General

Expandakiosk is an insulated closed volume demountable storage container. Assembly of the store is simple, using the bolts supplied.

Construction Components

The hand construction elements of the man-portable building are as follows:

- Chassis
- Side wall panels
- Roof panel
- Door panel with double locking system
- Fastening elements

Floor

Pre-fitted 18mm grade 3 ‘Norbord’ Canadian Sterling Board screwed to a galvanised steel profile frame.

Chassis

Box profile galvanised steel.

Side Walls & Roof Panel

Panels are composed of outer and inner skin that shall be 0,40mm painted with 5micron primer, 20 micron finishing coat galvanized steel sheet, 40 mm thickness Polyurethane insulation in between.

Door Panel

0.6 mm galvanized steel panel. The door is mounted into the frame with stainless steel hinges. Complete with two 64mm Euro deadlocks with replaceable cylinders and a central roller catch. Door width: 1250mm, hinged on the right, outward opening.

Hatch Panel

0.6 mm corrugated galvanized steel panel. The hatch is mounted into a steel frame with stainless steel hinges. Hatch width: 2839mm, hinged on the top, upward opening. Secured from the inside with two locks.

Packing

All components of the Expandakiosk hand-portable building are specially packed to ensure that they are not damaged during transportation, loading and unloading under normal circumstances. The smallest transportation cube is achieved in this packing process.

Powder Coating

Powder coating to outer skin is RAL 6005 Green, inner skin is RAL 9002 Off-White.
