

A large green portable storage unit with vertical corrugated panels. It has a white van partially visible on the left with a red 'e' logo and the number '3713' and '.o.uk'. The unit has a stainless steel hinge on the door and a lock mechanism. A small white label on the top edge reads 'expandastore' and '01842 830040'. The background shows trees and a clear blue sky.

# expandastore

The UK's best selling man portable  
flat packed storage unit

## The all NEW improved Expandastore now features:

- Robust construction with stronger wall panels
- Improved security with stainless steel hinges
- Outstanding value for money

## Providing extra storage space... when and where you need it...

Expandastore is the UK's best selling flat pack storage unit and is the ideal solution for getting secure and flexible storage in previously inaccessible areas. Ideal for a wide range of uses, each unit is man portable, easy to erect and disassemble meaning they can be used wherever you work and need additional storage space.

- **Man-portable:** Easily carried through alleys and passageways to previously inaccessible areas... can be used almost anywhere!
- **Demountable:** Dismantles into flat pack form quickly for transportation and re-assembling at another site
- **Complete:** Everything required for assembly is in the kit. No additional fixings needed
- **Secure:** Robust construction and double locking system is standard
- **Simple:** No specialist tools are required for assembly, just a socket set and a screwdriver
- **Quick:** Ready for use in less than an hour

## technical specifications

- Length: 2m or 3m or 4m
- Width: 2.1m
- Height: 2.1m
- All flat packed units are 300mm high
- All assembled units are 2093mm high

(other special colours available on request)

### General

Expandastore is an un-insulated closed volume demountable storage container. Assembly of the store is simple, using nuts and bolts supplied.

### Construction Components

The main construction elements of the man-portable building are as follows:

- Chassis
- Side wall panels
- Roof panel
- Door panel with double locking system
- Fastening elements
- Forklift pockets (available as optional extra)
- Adjustable levelling feet (available as optional extra)

## Floor

Pre-fitted 18mm grade 3 'Norbord' Canadian Sterling Board screwed to a galvanised steel profile frame.

## Chassis

Box profile galvanised steel.

## Side Walls & Roof Panel

0.6 mm box profile galvanized steel panels. The panels have been strengthened and galvanized steel frame sections at the edges of each panel. The roof section has two integral gutters for effective rainwater dispersal to all four corners of the container.

## Door Panel

0.6 mm box profile galvanized steel panel. The door is mounted into the frame with stainless steel hinges. Complete with two 64mm Euro deadlocks with replaceable cylinders and a central roller catch. Door width: 1250mm, hinged on the right, outward opening.

## Fastening Elements

Four 12 mm diameter rods are used to connect the roof to the chassis. These also form lifting eyes for use with a crane

(available at additional cost). Roof security bolts are supplied to prevent external access to the man-portable building.

## Packing

All components of the Expandastore man-portable building are specially packed to ensure that they are not damaged during transportation, loading and unloading under normal circumstances. The smallest transportation cube is achieved in this packing process.

## Powder Coating

Optional powder coating in green (RAL 6005) or blue (RAL 5010). Other colours from the standard RAL range are available upon request.

## Additional Information

Doors can be fitted in the long panel at no additional cost. Prices vary depending on building specification requirements and delivery/installation logistics, so please call us to discuss your individual requirements.
